Test Document Rubric

Trait	Outstanding	Good	Marginal	Poor
Thorough explanation of the tests	Each test is accompanied by the following information: 1. What it is testing 2. Expected result 3. Actual Result 4. What you did about it if the expected result was different from the actual result.	Test Document is missing one of the essential items in column 1.	Test document is missing 2 of the essential items in column 2	Test document is missing 3 of the essential items in column 1

Guidelines:

Students need to be clear about what they are testing.

Students need to decide on the tests as they design the project.

Students need to check the tests and make sure the results are the expected results.

Students should not use random data as tests. Each test should be designed with a specific goal in mind.
