

4. Once the corresponding IP address is found (147.134.2.84), the server sends it back to the browser.

1. The user enters the URL `www.creighton.edu/index.html` in the Address box of a Web browser.

3. The domain name server looks up `www.creighton.edu` in its table. If the server name is not found, a request is passed on to another domain-name server.

5. Finally, a request for the page `index.html` is sent over the Internet to the Web server with IP address 147.134.2.84.
