Users' Manual Rubric

Trait	Outstanding	Good	Marginal	Poor
Can the user use it to execute the program?	Contains detailed explanation of what is required to install and execute the program. An explanation of how the program behavior. Inputs Outputs Examples Desired Results	Is missing some of the information on installing and executing.	Is missing information on either installation or execution	Is missing most of the information on both installation and execution

Guidelines:

The users' manual should tell the user how to install and execute the program.

In most classes this requires the location of the program as well as instruction to compile and execute the program.

Whoever is grading the program should be able to use the users' manual to run the program.
